

Comparing the specifications - find out why delivering Goodyear FIA European Truck Racing Championship victories is not the same as delivering commercial goods ...

RACE TRUCKS VS ROAD TRUCKS

TYRES

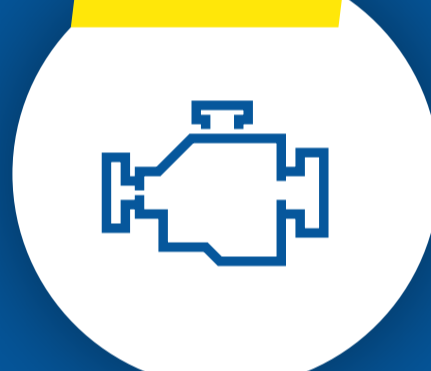

- Size: 315/70R22.5
- Carcass: standard Goodyear
- Tread design and compound: racing
 - Tyre inflation pressure: from 1,2 to 4,5 bars

- Size: 315/70R22.5
- Carcass: standard Goodyear
- Tread design and compound: different according to the application
- Tyre inflation pressure: from 7.0 to 9.0 bars

ENGINE

- Modified standard truck engine
 - Power: 1,200 BHP
 - Torque: 6,000 NM
 - Acceleration: 0-100 km/h in 6 seconds

- Engine: Standard truck engine.
- Power: 500 BHP
- Torque: 2,500 NM

ELECTRONIC ASSISTANCE

- NO ABS
- NO ESP
- NO TRACTION CONTROL

- ABS
- ESP
- TRACTION CONTROL

SPEED

limited to
160
km/h

limited to
89
km/h

OVERALL WEIGHT

tonnes of which 3,150kg must be measured at the front axle
5,3

44 tonnes including fully laden trailer

BRAKES

- Standard truck brakes
- Operating temperature: up to 600° C
- Water cooling permitted

- Standard truck brakes
- Operating temperature: around 200° C
