

UNVEILING THE IMPACT OF OUR TIRES-AS-A-SERVICE OFFERING

Without Tires-as-a-Service

With Tires-as-a-Service

VEHICLE BREAKDOWN MANAGEMENT

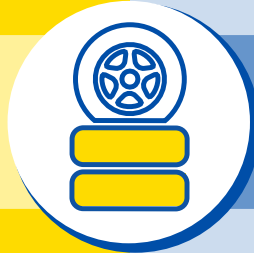

Fleet managers respond to vehicle breakdowns at all hours, and roadside repairs often take hours.

We can reduce vehicle breakdowns and improve uptime by monitoring fleets 24/7 and dispatching service providers.

INVENTORY

Fleets hold months of tire inventory on hand, tying up cash that could be better deployed elsewhere.

Our subscription service for tires eliminates the need to tie up cash in tire inventory.

FUEL CONSUMPTION

Underinflated tires lead to sub-optimal fuel performance.

Our solution uses automated tire inflation, premium tires and regular maintenance to help improve fuel efficiency.

ROUTINE MAINTENANCE

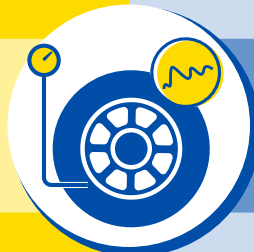

Routine tire maintenance requires significant manual work. Employees often check each vehicle for service needs.

We use tech-enabled solutions, advanced tracking and algorithms to streamline routine maintenance.

DRIVER SAFETY

Fleet managers have limited visibility into tire health and tread depth.

Our offering's proactive tread depth and leak detection flags vehicles that need attention.
